

CROMWELL'S VICTORY

Sequence of Play

Game Turn Sequence		Rules 4.0
1. Visibility Phase	[5.0]	6. Royalist Rally Phase [6.0]
2. Allied Rally Phase	[6.0]	7. Royalist Artillery Phase [7.0]
3. Allied Artillery Phase	[7.0]	8. Royalist March Phase [8.0]
4. Allied March Phase	[8.0]	9. Royalist Combat Phase [9.0–11.0]
5. Allied Combat Phase	[9.0–11.0]	10. Game Turn Record Phase [4.0]

1. Visibility Phase 5.0

Turns 1–6 are Clear; skip the phase. On turns 7–12 the Royalist player rolls one die, applies the turn modifier, and determines visibility from the table on page 2. The result lasts for the entire turn.

The *first* unmodified 6 rolled for visibility instead triggers the special rule in 5.4: visibility is Clear; skip both Rally and both Artillery phases; apply –2 to every Combat Table roll; disrupt every attacking unit that remains ordered after its combat.

2/6. Rally Phases Rules 6.0, 12.4–12.6

The active player **must** check every eligible disrupted unit.

1. Start with the unit's printed morale.
2. Add one same-force leader's command rating if that leader is in or adjacent to the unit's hex.
3. Apply terrain/train modifiers from page 2.
4. Roll one die; add 1 in Obscured or Minimal visibility. A modified roll ≤ modified morale rallies the unit.

Units adjacent to ordered enemies normally cannot rally. Demoralized units normally require a same-force leader stacked in their hex. See 6.2 and 13.6 for exceptions.

3/7. Artillery Phases Rules 7.0

Each controlled artillery piece may bombard one enemy unit. Resolve one bombardment completely before declaring the next.

1. Trace the shortest straight-line range and check LOS.
 2. Roll one die; add 1 if the target is in woods, close, or train terrain.
 3. Cross-index range and modified roll on the Artillery Table (page 3).
- Artillery can only disrupt an ordered target; a Dd against an already disrupted target has no effect. Artillery and leaders are never affected. Minimal visibility limits range to 2 hexes.

4/8. March Phases Rules 8.0, 11.8, 12.3

Move pieces one at a time. Movement is voluntary; unused MPs are lost.

- Ordered units spend MPs using the Terrain Effects Chart (page 2).
- Disrupted units move the number of hexes on their reverse side and ignore costs for terrain they may legally enter.
- Leaders pay 1 MP per hex, ignore hexside costs, and cannot enter towns.
- Artillery cannot move. Enemy ZOCs do not affect movement.
- At phase end: one unit per hex, plus any leaders and artillery.
- A unit entering enemy artillery captures it. A lone enemy leader is displaced to the nearest unit friendly to that leader.

5/9. Combat Phases: Declare Rules 9.0

Before resolving anything, announce **all** attacks.

- Ordered units exert ZOCs into all six adjacent hexes.
- Every active ordered unit in an enemy ZOC must attack.
- Every inactive ordered unit in an active unit's ZOC must be attacked.
- Disrupted units have no ZOC and cannot attack; attacking them is optional.
- Each unit can attack or be attacked only once. Adjacent units may combine when every attacker is adjacent to every defender.

5/9. Combat Phases: Resolve Rules 10.0–11.0

Resolve each declared combat separately and apply its result immediately.

1. Declare eligible Heavy Horse charges; double charging strength.
 2. Halve each attacker fighting out of marsh, across ditch or stream, or upslope; drop fractions before combining.
 3. Total attacker and defender strengths. An eligible stacked leader adds up to the unit's printed strength.
 4. Select the Combat Table terrain line most favorable to the defender. Form attacker-to-defender ratio and round down to a listed ratio.
 5. Roll one die and apply the result from the Combat Table (page 3).
- Heavy Horse may charge only disrupted Foot, subject to 10.2, visibility, and demoralization. Charging units that remain ordered after combat become disrupted. There are no retreats or advances after combat.

10. Game Turn Record Phase Rules 4.0, 15.0

The Allied player advances the Game Turn Marker one box. If it is already in the turn 12 box, the game ends. Total victory points and compare the larger score to the smaller as a ratio.

Continuing Reminders

Leaders [12.0]. Leaders affect only units of their own force. Use no more than one leader per unit for a rally check or combat. If a stacked unit is eliminated, make the leader evasion roll in 11.9.

Demoralization [13.0]. Track loss points as they occur. Royalists demoralize at 100; Allies at 115. Only one army can demoralize. Apply the rally, movement, exit, and charge restrictions in 13.6–13.9.

Trains [14.0]. Ordered Foot entering the enemy train is disrupted. On first entry, eligible ordered units within 3 hexes make looting checks. Royalist entry of the Allied train also removes Leven from play.

Victory [15.0]. Award VPs for eliminated units and leaders, disrupted enemy Foot, captured artillery, looted trains, and enemy demoralization. Values and victory levels appear on page 3.

Artillery, Combat & Scoring

Artillery Table

[7.0]

Die Roll	Range in Hexes from Artillery to Target					
	1	2	3	4	5	6+
1	Dd	Dd	Dd	Dd	Dd	Dd
2	Dd	Dd	Dd	Dd	Dd	—
3	Dd	Dd	Dd	—	—	—
4	Dd	—	—	—	—	—
5	—	—	—	—	—	—
6	—	—	—	—	—	—

Dd = Defender Disrupted. Disrupt an ordered target; no effect on a disrupted target. **— = No Effect.** Add 1 to the roll if the target is in woods, close, or train. Ranges below 1 are impossible; ranges above 6 count as 6. Minimal visibility limits range to 2.

Combat Table

[9.0–11.0]

Terrain		Combat Ratio										
Marsh	1–6	1–5	1–4	1–3	1–2	1–1	2–1	3–1	4–1	5–1	6–1	
Clear/Slope/Hilltop	1–5	1–4	1–3	1–2	1–1	2–1	3–1	4–1	5–1	6–1		
Train/Close—Horse	1–4	1–3	1–2	1–1	2–1	3–1	4–1	5–1	6–1			
Train/Woods—Foot	1–3	1–2	1–1	2–1	3–1	4–1	5–1	6–1				
Close—Foot	1–2	1–1	2–1	3–1	4–1	5–1	6–1					

Die Roll		Result										
1	Ad	—	—	Dx	Dd	Dd	Dd	De	De	De	De	
2	Ad	Ad	—	—	Dx	Dd	Dd	Dd	De	De	De	
3	Ae	Ad	Ad	—	—	Dx	Dd	Dd	Dd	De	De	
4	Ae	Ad	Ad	Dx	—	—	Dx	Dd	Dd	Dd	De	
5	Ae	Ae	Ad	Ad	Dx	—	—	Dx	Dd	Dd	Dd	
6	Ae	Ae	Ae	Ad	Ad	Dx	—	—	Dx	Dd	Dd	

Ad: disrupt all attackers. **Dd:** eliminate disrupted defenders; disrupt ordered defenders. **Dx:** eliminate disrupted defenders, disrupt ordered defenders, then the attacker selects participating units with combined printed strength at least equal to the defenders' face-up strength and disrupts them. **De/Ae:** eliminate all defenders/attackers. **—:** no effect. Ratios below/above the line's limits use its lowest/highest column. There are no retreats or advances.

Demoralization Loss Points

Rules 13.0

Event affecting an army	Loss Points
Friendly unit eliminated	+ front combat strength
Friendly leader eliminated (not Leven)	+ 5× command
Enemy captures/recaptures artillery	+5; captor –5
Enemy first enters friendly train	+20; enemy –5
Thresholds: Royalists 100; Allies 115. Only the first army to reach its threshold demoralizes. Newcastle Foot and Manchester Horse never demoralize.	

Victory Points

Rules 15.0

Scoring event	VP
Enemy unit eliminated	front combat strength
Enemy leader eliminated	3× command
Cromwell / Rupert / Leven eliminated	30 / 15 / 0
Enemy Foot disrupted at game end	[front strength/2]
Enemy artillery captured at game end	10
Royalist / Allied train looted	20 / 35 to enemy
Royalist / Allied army demoralized	50 / 75 to enemy
Victory ratio: below 1.5–1 draw; 1.5–1 marginal; 2–1 major; 2.5–1 crushing.
