

# TITO

## Playbook

### A Scripted Example of Play

Game-Turns 1–5

---

Milja Marin, Yugoslav Partisan

Josip Broz Tito with members of his staff

This playbook teaches the opening of *Tito* by walking through a deliberately scripted game. The decisions are legal and plausible, but they are chosen to demonstrate systems rather than provide perfect strategy. Follow the stated setup and use the printed die rolls to reproduce the example at the table.

**Presentation by Daniel J. Berger**

Version 0.1

July 25, 2026

#### PREPARE THE GAME

Use the complete setup on page 3

#### PLAY THE EXAMPLE

Resolve GT1–5 with the displayed results

#### CONTINUE THE CAMPAIGN

Begin GT6 from the final checkpoint

# How to Use This Playbook

The example follows the complete Sequence of Play, but compresses phases in which no choice or game-state change occurs. Every prescribed die roll is shown in a red box. Rules citations point to the restored rulebook.

The map illustrations are snapshots, not stack inventories. Numbered callouts match the accompanying prose; exact stacks are stated in the text and in each turn ledger. Counters are not drawn to scale.

## Rules in focus

- Game-Turn 1: movement, objectives, combat, retreat, and recruitment.
- Game-Turn 2: drought, Chetnik collaboration, and Tito.
- Game-Turn 3: Anti-Guerrilla Operations and uprisings.
- Game-Turn 4: winter, brigade formation, and expanded Axis movement.
- Game-Turn 5: locating Tito and an elimination attempt.

## Contents

|                                     |    |
|-------------------------------------|----|
| Preparing the Game                  | 3  |
| Game-Turn 1: Testing the Occupation | 4  |
| Game-Turn 2: Tito Enters the War    | 5  |
| Game-Turn 3: The War Spreads        | 6  |
| Game-Turn 4: Winter and Escalation  | 8  |
| Game-Turn 5: The Hunt for Tito      | 9  |
| After Five Turns                    | 10 |

## Conventions

|              |                                 |
|--------------|---------------------------------|
| <b>P</b>     | Partisan                        |
| <b>C</b>     | Chetnik                         |
| <b>Y/A/N</b> | pro-Yugoslav, pro-Axis, neutral |
| <b>SP</b>    | Combat Strength Points          |
| <b>AGO</b>   | Anti-Guerrilla Operation        |
| <b>GT</b>    | Game-Turn                       |

### Play note

This tutorial uses the original restored rules. It does not employ the unverified online addenda.

## Sequence Used on Every Complete Game-Turn

| A              | B             | C              | D         | E              |
|----------------|---------------|----------------|-----------|----------------|
| Special Events | Yugoslav Turn | Victory Points | Axis Turn | Terminal Stage |

Game-Turn 1 begins with Stage B; Game-Turn 17 ends after Stage C. The phase headings in the example preserve these letters so the reader can always locate the action in the complete sequence.

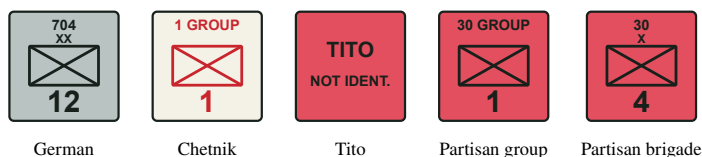

## Before You Begin

1. Turn to “Preparing the Game” on page 3 and follow its complete setup instructions.
2. Keep the rulebook and player aid beside the map. The playbook explains the example; it does not repeat every restriction.
3. Use the red-boxed results rather than rolling. Update the displayed VP, Partisan, Chetnik, and AGO totals at the end of every turn.

## Reading the Detail Panels

- Numbered badges correspond to matching badges in the accompanying prose.
- A badge sits near the affected location; it does not define a connection or movement path.
- Counter stacks appear where they clarify the action; a dark  $\times N$  tab gives the number of identical counters. The text and checkpoint tables remain the authoritative stack inventory.

## Counters You Will Meet First

# Preparing the Game

## Rules in focus

Set up every unit listed in **[15.1–15.2]**. The choices below specify only the locations that matter to the tutorial. Units not named individually may occupy any legal Objective Display in their assigned Zone; keep **Pančevo** and **Peć** free of Axis units.

## Key Axis Placements

| Unit             | Objective  | Province   |
|------------------|------------|------------|
| German 704       | Belgrade   | Serbia     |
| German 714       | Kragujevac | Serbia     |
| German 717       | Niš        | Serbia     |
| German 718       | Zenica     | Bosnia     |
| Serbian 1–5      | Belgrade   | Serbia     |
| Italian Bergamo  | Zagreb     | Croatia    |
| Italian Sassari  | Karlovac   | Croatia    |
| Italian Macerata | Padjorica  | Montenegro |
| Italian Re       | Cetinje    | Montenegro |

Place the remaining Italians throughout their assigned Zones. In Montenegro, leave Peć empty; put one of the remaining divisions in every other unassigned Objective Display, then add a second division at Bauxite and Dubrovnik. Place the Bulgarian 14th, 22nd, and 24th Divisions in Skopje, Prilep, and Monastir respectively.

## Yugoslav Placements

Place five Chetnik groups in the Serbia Chetnik Hide-away and two in the Montenegro Chetnik Hide-away. All seven begin pro-Yugoslav.

## AGO Limit

For this example, the Axis Player draws the Soviet counter with **8 AGO** on its reverse. Keep it concealed as normal **[15.31–15.32]**. The example will expend three operations by the end of Game-Turn 5.

## Why This Setup?

The starting deployments preserve the historical spheres of influence while creating two safe Yugoslav probes:

- Pančevo offers the Chetniks a useful Recruitment Value of 1 and a Victory Point Value of 2.
- Peć offers a smaller but initially unopposed foothold.
- The German divisions remain close enough to demonstrate the Axis three-Zone movement allowance and a mandatory Objective combat.
- Croatia and Bosnia remain under-garrisoned, setting up the first uprising checks on Game-Turn 3.

## Play note

The original setup rules assign units to Zones, not to particular Objective Displays. This freedom is intentional: two legal games can begin with quite different local situations. The Montenegro deployment deliberately doubles the garrisons at Bauxite and Dubrovnik to leave Peć open for the tutorial's first probe.

## Starting Tracks

|                   |                       |
|-------------------|-----------------------|
| Game-Turn         | 1                     |
| Yugoslav VP       | 0                     |
| Allied Progress   | Not yet begun         |
| Weather           | Normal                |
| Tito              | Not yet on map        |
| Partisan strength | 0 groups              |
| Chetnik strength  | 7 pro-Yugoslav groups |

The complete map before counters are placed. Detail panels on the following pages isolate the active areas without losing their relationship to this overview.

## 1

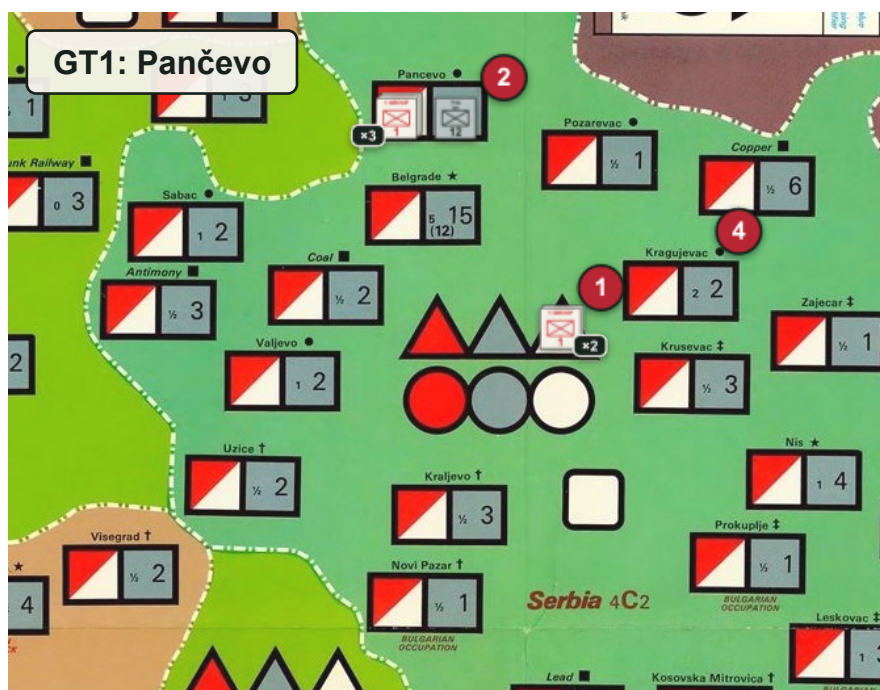

## GAME-TURN

## Testing the Occupation

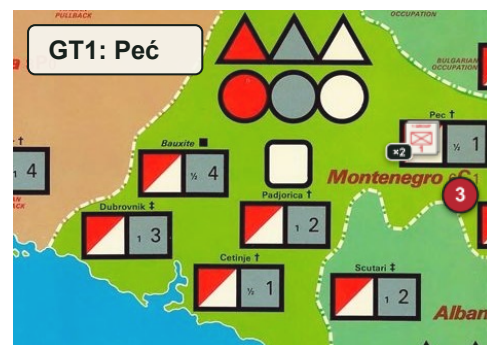

The Chetniks probe two undefended objectives; the Axis answers at Pančevo.

## Rules in focus

**[4.1]** Game-Turn 1 begins with the Yugoslav Player-Turn, so the entire Special Events Stage is skipped. Both sides must remain within their starting Zones on Game-Turns 1 and 2 **[6.63, 15.4]**.

Serbia: the Pančevo probe and German reply

Montenegro: the unopposed move to Peć

## B. Yugoslav Player-Turn

**Movement.** From the Serbia Hide-away **1**, move three Chetnik groups to Pančevo **2** and two to the Chetnik Mountain triangle. From the Montenegro Hide-away, move both groups to Peć **3**. All movement is within the units' starting Zones.

**Combat.** The Axis boxes of Pančevo and Peć are empty, so there is no corresponding enemy stack and no combat **[8.11]**.

## C. Victory Point Stage

Pančevo is worth 2 VP and Peć 1 VP. The Yugoslav Player gains **3 VP**. The two groups in the Serbia Mountain yield no Mountain VP:  $2 \div 4$ , rounded down, is zero **[14.2B]**.

## D. Axis Player-Turn

German 714 moves from Kragujevac to the Axis box at Pančevo **4**. Opposing units now occupy corresponding Objective boxes, so combat is mandatory.

## Combat calculation

German 714 attacks with 12 SP against 3 Chetnik SP: **4:1**. The Axis Player rolls **3**, producing **D1**. Pančevo is a market town, so the numbered result is doubled to **D2** **[8.32B]**. Two groups are removed and the survivor retreats to the Serbia Chetnik Hide-away **[8.24A]**.

## E. Terminal Stage

**Recruitment.** The two Chetnik groups at Peć occupy an Objective with a Recruitment Value of one-half. The Yugoslav Player rolls **4**, so  $4 \times \frac{1}{2} = 2$  groups. This does not exceed the two occupying Yugoslav SP, so two new Chetnik groups are placed at Peć **[7.44A]**. Peć now contains four.

The two Chetnik groups in the Serbia Mountain create none:  $2 \div 4 = 0$  after fractions are dropped **[7.45]**.

There is no Tito Segment, no Uprising Segment before Game-Turn 3, and neither guerrilla type has reached brigade strength. Advance the Game-Turn marker.

## What the Turn Demonstrated

- A unit may move freely among locations within its Zone.
- Combat in corresponding Objective boxes is mandatory.
- Terrain modifies a numbered combat result, not the combat ratio.
- Yugoslav retreats go to the appropriate Hide-away.
- Objective recruitment is limited by occupying Yugoslav SP.

VP this turn +3  
Partisans None  
AGO expended 0 of 8

Running VP 3  
Chetniks (Y/A/N) 7 / 0 / 0

## 2

## GAME-TURN

## Tito Enters the War

*Weather, collaboration, and predetermined Partisan reinforcements transform the map.*

Serbia: Tito and ten groups divide

## A. Special Events Stage

**Weather.** The Yugoslav Player rolls **2**; drought is in effect for Game-Turns 2–5 [11.21–11.23]. Drought halves recruitment in market towns, but does not affect towns or Mountains.

**Axis reinforcements.** Place German 342 at Kragujevac (Serbia), German 125 at Tuzla (Bosnia), and the Croat Guard regiment and 1st–3rd Ustaša brigades at Zagreb (Croatia) [13.91].

**Chetnik collaboration.** Roll once for each occupied Chetnik location [7.21, 7.23A]:

| Stack                | Roll | Modifier | Result       |
|----------------------|------|----------|--------------|
| Serbia Mountain (2)  | 2    | +1       | Neutral      |
| Serbia Hide-away (1) | 4    | +1       | pro-Yugoslav |
| Peć (4)              | 1    | +1       | pro-Axis     |

Move the neutral stack to Serbia's Neutral Chetnik box and the pro-Axis stack to Montenegro's Axis Mountain [7.24].

## B. Yugoslav Player-Turn

At the beginning of Movement, place the predetermined reinforcements [7.41, 13.92]. There are 17 groups: 10 plus Tito in Serbia, 4 in Slovenia, and 3 in Montenegro. All groups are P1 and are placed in their respective Partisan Hide-away circles. Because Game-Turn 2 still has the starting-Zone restriction, move them as follows:

- Serbia: three groups to Uziče **2**, three to Novi Pazar **3**, and four plus Tito to the Partisan Mountain **1**.
- Slovenia: all four groups to the Partisan Mountain **4**.
- Montenegro: all three groups to Peć **5**.

## Play note

Tito is a unit for movement and reaction purposes, but has no Combat Strength. His immediate value is organizational: he generates Partisan groups and must be present when the first Partisan brigade is formed.

Montenegro

## C. Victory Point Stage

Uziče, Novi Pazar, and Peć yield 4 VP. The Serbia and Slovenia Mountains each contain 4 Partisan SP and yield 1 VP. Gain **6 VP**; the running total is **9**.

## D. Axis Player-Turn

**Movement.** German 704 moves from Belgrade to the Axis box at Uziče. Italian Macerata moves from Padjorica to the Axis box at Peć, while Italian Re moves from Cetinje to the newly vacated Axis box at Padjorica. All three units remain within their starting Zones [6.16, 6.63].

**Combat.** German 704 attacks the three groups in Uziče. At 12:3 the ratio is 4:1; a **3** produces D1, doubled to D2 for the town. Two groups are removed and one retreats to the Serbia Partisan Hide-away. Italian Macerata attacks Peć at 6:3, or 2:1. A **5** produces D1, doubled to D2. Again, two groups are removed and the survivor retreats.

## E. Terminal Stage

## Recruitment rolls:

- Novi Pazar: **4** times one-half creates 2 groups.
- Serbia Mountain:  $4 \div 4$  creates 1 group.
- Slovenia Mountain:  $4 \div 4$  creates 1 group.
- Tito in Serbia creates 1 group [7.46C].

The Partisans finish with  $17 - 4 + 5 = 18$  groups. There are still no uprisings and no organization upgrades.

VP this turn +6  
Partisans 18 groups  
AGO expended 0 of 8

Running VP 9  
Chetniks (Y/A/N) 1 / 4 / 2

## 3

## GAME-TURN

## The War Spreads

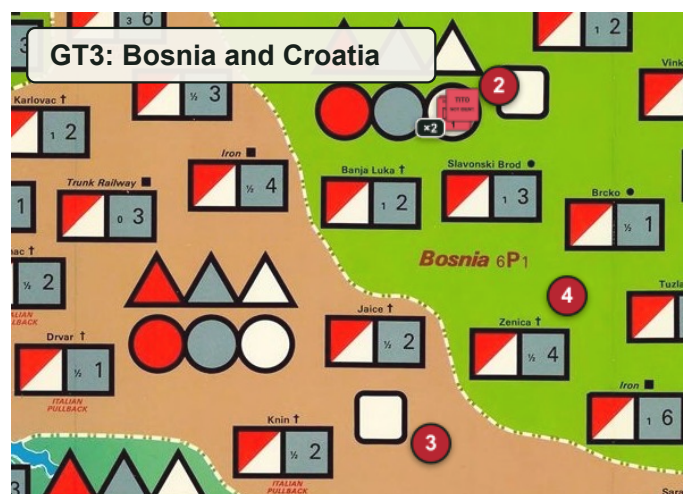

The first Anti-Guerrilla Operation drives Tito west; uprisings bring the Partisans to brigade strength.

## Rules in focus

Game-Turn 3 activates two major systems: Axis Anti-Guerrilla Operations [8.4] and the Uprising Segment [7.47, 7.5]. The starting-Zone restriction has also expired.

Serbia: AGO deployment and reaction west

Bosnia and Croatia: Tito's refuge and uprising checks

## A. Reinforcement and Collaboration

Place German 113 at Zenica (Bosnia) and the 4th and 5th Ustaša brigades at Bihać (Croatia). Transfer German 125 from Tuzla as scheduled [13.91].

Resolve collaboration:

| Stack                   | Roll | Mod. | Result       |
|-------------------------|------|------|--------------|
| Serbia neutral (2)      | 5    | 0    | pro-Yugoslav |
| Serbia pro-Yugoslav (1) | 3    | +1   | Neutral      |
| Montenegro pro-Axis (4) | 5    | -1   | Neutral      |

The Axis Player now has no Chetnik groups under control, but this calm will not last.

## A. Axis Anti-Guerrilla Operations Phase

**Planning.** The Axis declares one operation and secretly records *Serbia* 1. German 704, 714, 717, and 342 are selected; each could reach Serbia in a normal Movement Phase and the total is below seven division equivalents [8.41–8.42].

**Reaction.** The Yugoslav Player rolls 3. Tito and two Partisan groups leave the Serbia Mountain for the Bosnia Partisan Hide-away 2. Tito counts as one of the three reacting units. Four groups remain in the Serbia Mountain.

**Deployment and combat.** Put 714 and 717 in the Axis Mountain and 704 and 342 in the Axis Hide-away:

- Mountain:** 24 SP attacks 4 SP at 6:1. The AGO adjustment moves this to 8:1. A 1 produces D1, doubled to D2. Two groups are lost and two retreat to the Bosnia Partisan Hide-away.
- Hide-away:** 30 SP attacks the lone group that retreated from Užice. Its defensive strength is doubled to 2, yielding 15:1, capped at 12:1. A 1 produces De and eliminates it.

The four German divisions are removed pending redeployment [8.47]. The Yugoslav Player has lost three groups, but the reaction saved Tito and gave the survivors a common refuge in Bosnia.

## Play note

An AGO changes the ratio by two columns, doubles numbered results, and sends retreating Yugoslav units to an adjacent Zone. Axis units are never forced to retreat during the operation [8.46].

## Situation After the Operation

|                             |                                                          |
|-----------------------------|----------------------------------------------------------|
| <b>Bosnia Hide-away</b>     | Tito and 4 Partisan groups                               |
| <b>Serbia</b>               | 5 groups at Novi Pazar; no Partisans in the Zone Display |
| <b>Slovenia Mountain</b>    | 5 Partisan groups                                        |
| <b>Montenegro Hide-away</b> | 1 Partisan group                                         |
| <b>Partisan total</b>       | 15 groups                                                |

# From Groups to Brigades

*Recruitment and two under-garrisoned Zones fill the Partisan counter pool.*

## B. Yugoslav Player-Turn

Move Tito and all four Bosnia groups from the Hide-away to the Partisan Mountain, then send one group to Tuzla. Three groups remain with Tito. Keep the five-group stack at Novi Pazar and the five groups in the Slovenia Mountain. Move the lone Montenegro group back to Cetinje.

## C. Victory Point Stage

Novi Pazar, Tuzla, and Cetinje yield 4 VP. The Slovenia Mountain yields 1 VP for its 5 SP. The Bosnia Mountain has only 3 SP and yields none. Gain **5 VP**; the running total becomes **14**.

## D. Axis Player-Turn

The Axis emphasizes garrison duty and initiates no Objective combat. Units used in the Serbia AGO remain off map until the Redeployment Phase, but may count toward Serbia's garrison because that was the target Zone **[7.54]**.

## E. Recruitment and Tito Segments

The Partisans begin the Terminal Stage with 15 groups:

| Source                                 | Groups |
|----------------------------------------|--------|
| Novi Pazar: <b>6</b> × one-half, cap 5 | 3      |
| Slovenia Mountain: 5 ÷ 4               | 1      |
| Tuzla: <b>6</b> × one-half, cap 1      | 1      |
| Cetinje: <b>4</b> × one-half, cap 1    | 1      |
| Tito in Bosnia                         | 2      |
| Total before uprisings                 | 23     |

|                     |                       |
|---------------------|-----------------------|
| <b>VP this turn</b> | +5                    |
| <b>Partisans</b>    | 27 groups + 1 brigade |
| <b>AGO expended</b> | 1 of 8                |

## E. Uprising Segment

**Croatia 3.** Two Italian divisions, the Croat Guard regiment, and five Ustaša brigades equal  $4\frac{5}{6}$  divisions. Drop the fraction when calculating the shortfall: Croatia is four divisions below its Garrison Value of 8. The uprising roll is **1**; with a modifier of 0, the modified result is 1. Four short divisions times 1 creates **4 groups**. An alignment roll of **4** is even, so all are Partisan in this P-aligned Zone.

**Bosnia 4.** German 718 and 113 provide two divisions against a Garrison Value of 6. A **2**, less Bosnia's modifier of 1, gives a modified result of 1. Four more Partisan groups would be created after an even alignment roll of **2**, but only three Partisan group counters remain. Place those three in the Bosnia Partisan Hide-away **[7.53, 7.68]**.

The Partisans now have all **30 group counters** on the map and have achieved brigade strength **[7.62A]**.

## E. Guerrilla Status Phase

The first brigade must be created where Tito is located. Five groups occupy the Bosnia Mountain with Tito: three moved there and two arrived in the Tito Segment. Replace three with the 31st Partisan Brigade. Two groups remain with Tito **[7.63, 7.67]**.

### The important trigger

The first Partisan brigade has appeared. Beginning next Game-Turn, German movement expands into the Italian sphere, the Bulgarian 25th and 27th Divisions become available, and the Axis may attempt to identify Tito **[6.64, 9.41, 13.91D]**.

|                         |           |
|-------------------------|-----------|
| <b>Running VP</b>       | 14        |
| <b>Chetniks (Y/A/N)</b> | 2 / 0 / 5 |

## Checkpoint Before Game-Turn 4

|                          |                              |
|--------------------------|------------------------------|
| <b>Bosnia Mountain</b>   | Tito, 31st Brigade, 2 groups |
| <b>Bosnia Hide-away</b>  | 3 groups                     |
| <b>Tuzla</b>             | 2 groups                     |
| <b>Croatia Hide-away</b> | 4 groups                     |
| <b>Slovenia Mountain</b> | 6 groups                     |
| <b>Novi Pazar</b>        | 8 groups                     |
| <b>Cetinje</b>           | 2 groups                     |

Redeploy the four German AGO divisions in Serbia. The first-brigade trigger is now permanent even if Partisan strength later falls below 30 group equivalents.

## What the Turn Demonstrated

- An AGO is planned before reaction, so the Axis commits units without knowing exactly which guerrillas will remain.
- Reaction can preserve Tito and concentrate scattered survivors in an adjacent Zone.
- AGO participants still count toward the target Zone's garrison while awaiting redeployment.
- Objective recruitment, Tito, and uprisings all resolve before the Guerrilla Status Phase.
- Counter availability is a hard limit: excess uprising reinforcements are lost.

### A real decision

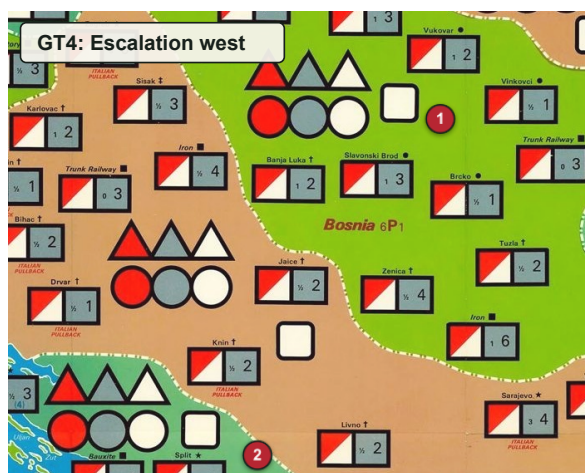

The first brigade need not be the 31st, and the Yugoslav Player could leave all five Bosnia Mountain groups unorganized. Creating it now is stronger and activates several Axis responses; delaying it conceals Tito for longer.

## 4

## GAME-TURN

## Winter and Escalation

The first brigade unlocks a wider Axis response, while winter suppresses Mountain recruitment.

West: Tito is identified and German 342 enters Croatia

Serbia: Bulgarian 25th and 27th enter

### A. Special Events Stage

**Winter.** Game-Turn 4 is automatically Winter [11.1]. Recruitment in villages and Mountains will be halved.

**Tito Phase.** Because the first Partisan brigade appeared last turn, the Axis may attempt to identify Tito. A 6 succeeds; flip Tito to his identified side 1 [9.41].

**Axis reinforcements.** Transfer German 113 from Zenica. In Bosnia, place six new Croat brigades at Zenica, including mountain brigades 1-4; place the other four at Zagreb (Croatia). The brigade trigger also releases Bulgarian 25 and 27; place them at Prokuplje and Leskovac, respectively, in Serbia 3 [13.91D].

### Collaboration.

| Stack                   | Roll | Mod. | Result       |
|-------------------------|------|------|--------------|
| Serbia pro-Yugoslav (2) | 3    | +1   | Neutral      |
| Serbia neutral (1)      | 5    | 0    | pro-Yugoslav |
| Montenegro neutral (4)  | 2    | 0    | pro-Axis     |

### A. Anti-Guerrilla Operation: Bosnia

The Axis declares Bosnia. German 718 and four strength-2 Croat mountain brigades participate. The Reaction roll is 2; Tito and the 31st Brigade move to the Croatia Partisan Mountain. Two Partisan groups remain in the Bosnia Mountain and three in the Hide-away.

Split the Axis force:

- German 718 and two Croat brigades attack the Mountain: 16:2 is 8:1, adjusted to 10:1. A 1 gives D2, doubled to D4. Both groups are lost.
- Two Croat brigades attack the Hide-away: 4 SP against doubled defense of 6 begins at 1:2, adjusted to 2:1. A 5 gives D1, doubled to D2. Two groups are lost and one retreats to an adjacent Hide-away.

### B-D. Player-Turns and Victory Points

The Yugoslav Player preserves the dispersed Objective positions. The Victory Point Stage produces:

|                                     |      |
|-------------------------------------|------|
| Novi Pazar, Tuzla, and Cetinje      | 4 VP |
| Slovenia Mountain (6 SP)            | 1 VP |
| Croatia Mountain (one 4-SP brigade) | 1 VP |
| Turn total                          | 6 VP |

The running total is 20 VP.

During the Axis Movement Phase, German 342 begins in Serbia 4 and moves into Croatia 2. This would have been prohibited before the first-brigade trigger; German units may now enter the Italian sphere [6.64A].

### E. Terminal Stage

Recruitment at Novi Pazar, Tuzla, and Cetinje produces one group apiece after 2, 2, and 2. Tito produces three groups in Croatia.

Winter prevents Mountain recruitment in both illustrated cases:

$$\lfloor 6 \div 4 \rfloor \div 2 = 0 \quad \lfloor 4 \div 4 \rfloor \div 2 = 0.$$

After the four AGO losses and six reinforcements, 29 Partisan groups are on the map.

Croatia's Axis garrison now rounds down to seven divisions, one below its Garrison Value. An uprising roll of 1 and even alignment roll of 4 create the 30th Partisan group. Bosnia's roll of 1, reduced by its Uprising Modifier of 1, fails.

The three groups just created by Tito share his Mountain location. Replace them with the 32nd Partisan Brigade. Once brigade strength has been achieved, later brigades need not be created with Tito—but doing so here is convenient.

|              |                        |
|--------------|------------------------|
| VP this turn | +6                     |
| Partisans    | 27 groups + 2 brigades |
| AGO expended | 2 of 8                 |

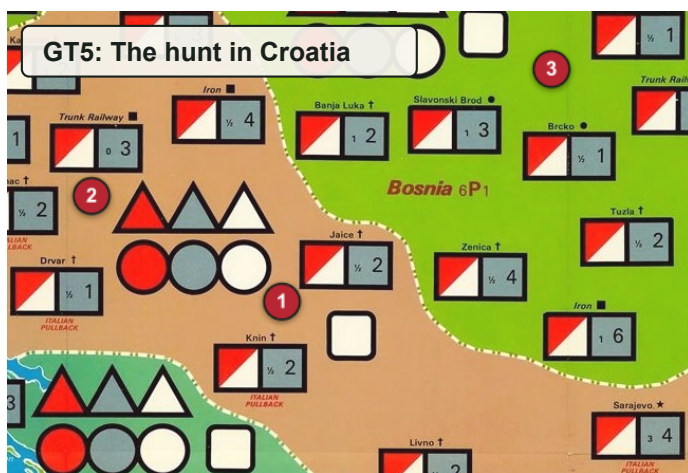

|                  |           |
|------------------|-----------|
| Running VP       | 20        |
| Chetniks (Y/A/N) | 1 / 4 / 2 |

## 5

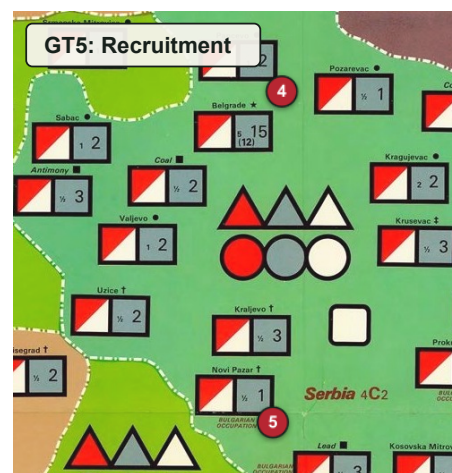

## GAME-TURN

## The Hunt for Tito

The Axis locates Tito, commits the 501st SS, and makes its single elimination attempt.

Croatia and Bosnia: the hunt, AGO, and retreat

Serbia: doubled recruitment penalty and one surviving source

### A. Tito, Reinforcement, and Collaboration

Tito was identified last turn, so the Axis may now attempt to locate him. The roll is **6**: Tito is located **1**, making the German 501st SS Parachute Battalion available in the ensuing Axis Reinforcement Phase [9.42]. Place it at Zagreb in Croatia. Transfer German 342 as scheduled.

Resolve collaboration:

| Stack                   | Roll     | Mod. | Result       |
|-------------------------|----------|------|--------------|
| Serbia neutral (2)      | <b>5</b> | 0    | pro-Yugoslav |
| Serbia pro-Yugoslav (1) | <b>2</b> | +1   | Neutral      |
| Montenegro pro-Axis (4) | <b>3</b> | -1   | pro-Axis     |

### A. Anti-Guerrilla Operation: Croatia

The Axis commits the 501st SS, German 704, Italian Bergamo, and two Croat mountain brigades to the Croatia operation **2**: 23 SP in all. The Reaction roll is **1**. The Yugoslav Player moves an exposed Partisan group elsewhere but deliberately leaves Tito and both Partisan brigades in the Croatia Mountain so the tutorial can demonstrate the elimination procedure.

Deploy the entire Axis force in the corresponding Axis Mountain. Before normal combat, make the one permitted elimination attempt [9.43]. The Axis rolls **3**; Tito is not eliminated, but is withdrawn for three full Game-Turns. Put his counter aside. He will return as a Partisan reinforcement on Game-Turn 9.

#### Play note

The attempt has now been spent even though Tito survived. A result of 6 would have eliminated him; 1-5 withdraws him for that many full Game-Turns.

**Resolve the AGO combat.** The Partisan brigades defend with 8 SP. Twenty-three to eight rounds down to 2:1; the AGO adjustment moves the attack to 4:1. A **3** produces D1, doubled to D2. A strength-4 brigade cannot satisfy a 2-SP loss, so no unit is eliminated, but both brigades must retreat. The Axis chooses the Bosnia Partisan Hide-away **3** [8.22A, 8.46].

### B-D. Player-Turns and Victory Points

During Yugoslav Movement, move the two brigades from the Bosnia Hide-away to the Bosnia Mountain. Move two groups from Novi Pazar to Pančevo, leaving seven at Novi Pazar.

Victory Points:

|                                     |    |
|-------------------------------------|----|
| Pančevo, Novi Pazar, Tuzla, Cetinje | 6  |
| Bosnia Mountain: 8 SP, 2 units      | 2  |
| Slovenia Mountain: 6 SP             | 1  |
| Tito withdrawn                      | -5 |

Turn total

4

The running total is **24 VP**.

### E. Terminal Stage

Tito's absence halves all Objective and Mountain recruitment [9.32]. At drought-stricken Pančevo **4**, recruitment would be halved for drought and again for Tito's absence. More than one halving means **no reinforcement** [7.49].

Elsewhere, Bosnia Mountain creates 1 group after Tito's modifier. Rolls of **4** at Novi Pazar **5** and **4** at Tuzla create 1 group apiece after the same modifier. A **2** at Cetinje and the Slovenia Mountain calculation both round to zero. The three available group counters are now all in use.

Bosnia now has only three division equivalents against its Garrison Value of 6. An uprising roll of **2**, reduced by Bosnia's modifier of 1, would generate three Partisan groups after an even alignment roll of **2**. None can be placed because the Partisan group counter mix is exhausted [7.53, 7.68].

|              |                        |
|--------------|------------------------|
| VP this turn | +4                     |
| Partisans    | 30 groups + 2 brigades |
| AGO expended | 3 of 8                 |

|                  |           |
|------------------|-----------|
| Running VP       | 24        |
| Chetniks (Y/A/N) | 2 / 4 / 1 |

## After Five Turns

### Rules in focus

The example stops at a natural transition point. The Partisans have organized into brigades, German movement has expanded, the Chetniks are politically fragmented, and Tito is temporarily off map. Game-Turn 6 will introduce Allied Progress and a new Weather determination.

### End Position

| Item            | State after Game-Turn 5               |
|-----------------|---------------------------------------|
| Yugoslav VP     | 24                                    |
| Partisans       | 30 groups, 2 brigades                 |
| Tito            | Withdrawn; returns GT9                |
| Chetniks        | 2 pro-Yugoslav, 4 pro-Axis, 1 neutral |
| AGO reserve     | 5 remain from the secret limit of 8   |
| Weather         | Drought ends with GT5                 |
| Brigade trigger | In effect since GT3                   |
| Bulgarian 25/27 | Deployed in Serbia                    |
| German 342      | Transferred on GT5                    |

### What Happens on Game-Turn 6?

1. Begin Allied Progress in Box 1 and make the first progress roll **[10.11]**.
2. Make the GT6 Weather roll, establishing conditions through GT9 **[11.22B]**.
3. Tito remains off map; skip identification and location.
4. Deploy German 7SS **[13.91]**.
5. Continue collaboration and decide whether another AGO is worth one of the five remaining operations.

#### Do not read 24 VP as a forecast

The tutorial makes conservative Objective choices and deliberately exposes Tito. Its running total exists to teach the Victory Point Stage, not to model expert Yugoslav play or predict the final result.

### Five Opening Lessons

1. **Occupation is temporary.** Guerrillas can collect VP and recruits without defeating every Axis unit, but an Axis response can force them back into the Hide-aways.
2. **The political map matters.** Chetnik allegiance changes can transfer whole stacks between players or remove them from both players' control.
3. **Reaction is the defense against AGOs.** Moving Tito or an organized unit before deployment may matter more than preserving isolated groups.
4. **Garrison arithmetic drives growth.** A large Zone shortfall can create more Partisans than routine Objective recruitment.
5. **Triggers reshape the war.** The first brigade widens German movement, releases Bulgarian reinforcements, and starts the hunt for Tito.

### Rules Used Most Often

- 4.2 Sequence of Play
- 6.1–6.4 Movement and stacking
- 7.2 Chetnik collaboration
- 7.4–7.6 Recruitment, uprisings, organization
- 8.1–8.3 Combat and terrain
- 8.4 Anti-Guerrilla Operations
- 9.3–9.4 Tito, recruitment, and the hunt
- 11.0 Weather
- 13.9 Reinforcement and transfer schedule
- 14.2–14.3 Victory Points

Continue the game from Game-Turn 6—or reset the pieces and try a different opening.
